

# THE GOOD STUFF

Compiled by Todd Mrowice

## Play Golf like an NHL All-Star

Hockey stick technology makes its way to golf with the GELSTX shaft powered by Fujikura. This weighted shaft is the only swing trainer that works with your existing driver. At 2.5 times heavier than a standard shaft, simply pop your driver head on, swing away, and then pop it back onto your shaft. All main manufacturer adapters available. Encourages consistent tempo and produces increased club head/ball speed. \$149.99 and up [gelstx.com](http://gelstx.com)

## Wilson's D7 Line Expands

Chicago's own, Wilson, comes out strong in 2020 with the D7 Forged irons. Complementing the immensely popular D7 irons, the forged version is for the slightly better player. Tour-level distance and feel paired with Power Hole and Power Chamber technologies make these sticks long and forgiving. Ideal for those that want a thinner top line without going to blades. Standard shafts are KBS Taper Lite (steel) and True Temper Catalyst 80 (graphite). \$899.99 (4-PW steel) [wilson.com](http://wilson.com)

## A Walker's Bag Unlike Any Other

Sun Mountain has a knack for producing some of the best golf bags on the market. The 2.5+ 14-Way carry bag is not only spacious, it has features on top of features. Weighing just under four pounds, this bag gets its namesake from the 14 full-length individual club dividers. The X-Strap System is ideal for walkers, as is the beverage pouch and full-length apparel pocket. Available in six colors! \$239.99 [sunmountain.com](http://sunmountain.com)

## Comfy Walking from Skechers

Like golfing on the clouds, Skechers just knows how to make golf shoes comfy and light. The new GO GOLF Elite V.4 has a waterproof leather upper with all new Grip Flex spikeless technology, so you never sacrifice traction. The low drop design keeps your foot stable and low to the ground, and the Goga Mat cushioned insole keeps your dogs from barking all the way to the 19th hole and beyond. Available in gray/lime, black/white, and white/navy. \$105 [skechers.com](http://skechers.com)

## Mizuno

Mizuno has always been known for producing unreal feeling irons. More recently, drivers and fairway metals. Now, Mizuno drops on the equipment world some amazing putters. The M Craft Type I is a square back/mid slant for exaggerated putting arcs. Forged from premium 1025 mild carbon steel and then CNC milled to perfection. Also available in Type II (classic plumber's neck design) and Type III (mid-mallet) models. All available in blue ion, black ion, and white satin finishes. \$300 [mizunousa.com](http://mizunousa.com)

## A Rangefinder for Everyone

Precision Pro is known for rangefinders that are as good as the competition, but much more wallet friendly. The NX9 Slope is new for 2020 and has adaptive slope technology in addition to pulse technology and a 400-yard range. Water-resistant, shock-proof design, at a shock-proof price. \$269.99 [precisionprogolf.com](http://precisionprogolf.com)

## Another way to get an Edge

TourEdge touts the Exotics EXS 220 fairway club, lighter than its previous iteration, as the best for the price on the market. "Talk about a 'wow' factor!" said TourEdge founder David Glod. "Just a couple swings with the EXS 220 will prove why we are an industry leader in fairway metals." The weight change allows for easier launch off the fairway, combined with lower spin. It's available in five lofts, from 13.5 degrees to 21 degrees, the head size decreasing as the loft increases. All the usual shaft flexes are available. \$249.99 [www.touredge.com](http://www.touredge.com)
